# MobilMat

A proven system in the concrete industry and a solid investment for the future.

This mobile plant integrates all necessary equipment for superior concrete production in compact and easy-to-transport units. Portable and easily movable, pre-assembled, electrically wired and factory tested. Set up close to the project site assures increased efficiency and productivity.

## The heart of our plants

Well-proven Planetary Countercurrent Mixers HPGM 375 – 5250

Robust Twin Shaft Mixers DWM 1875 – 6750

1. Coarse/fine aggregate batching on weigh belt. Inclusive HYDROTESTER moisture probe and vibrator.
2. Aggregate heating systems. Covers for the bins are also available.
3. Easy feeding of inline bins with shovel loader. Feeding with automatic feeding system is also available.
4. Concrete discharge in ready-mix truck. Swiveling chutes for more flexibility.
5. Wiggert Control System.
6. High precision weigh belt for aggregate weighing. Factory assembled and calibrated.
7. Integrated into the mixer platform with either well-proven planetary countercurrent mixers (HPGM) or robust twin-shaft mixers (DWM).
  - Mixer aggregate feeding via skip hoist or inclined conveyor belt.
  - Cement, water and admixture batching specified by your needs.
  - Optimized and fast discharge into ready-mix truck.

Note: as with all of our equipment, some features are optional. All metric-to-imperial conversions are approximate.

## Engineered in Germany

Flexible equipment program for superior concrete production across North America.

WiCoMix Plants, MobilMat Plants, CentroMix Plants.  
Aggregate, Water, Cement, Admixture, Color and Fiber handling and dosing.  
Planetary Countercurrent Mixers HPGM, Twin Shaft Mixers DWM,  
Water Recycling Systems, Concrete Transport Systems and Control Systems.
